The aim of the society is to protect, maintain and improve the oral health of older people by providing a forum to further knowledge and increase awareness relating to oral health, dental needs and treatment for the benefit of older adults.

The society holds two meetings per year when members of different dental specialities and dental care professionals come together to consider and exchange information on the oral health care of older people.

BSG is also involved in the development of undergraduate and postgraduate teaching in Gerodontology. It motivates and fosters relations with other health care professionals, care workers, charitable organisations, voluntary agencies and carers for the benefit of older people, thereby enhancing health promotion.

Full membership of BSG includes a subscription to the Society’s scientific journal ‘Gerodontology’.
